DESCRIPTION

Camden Door Controls Push Button Stations meet the stringent requirements of industrial door applications. They are available in indoor and outdoor versions. They provide output contacts capable of carrying up to 10 Amps at 240 VAC. Indoor controls are NEMA 1 compliant. Outdoor controls meet NEMA 4 standards when installed with liquid tight conduit. UL Rated and CSA Approved.

APPLICATION

Camden CI series of industrial door controls are designed for use in factories, warehouses, and other industrial applications. Models are UL Listed and CSA approved. Outdoor controls are NEMA 4 rated for use in wet environments. These controls are ideal for activating overhead doors, storefront grills, shutters and gates.
